

Keep track of your mobile assets

Increase revenue and reduce costs by using your assets more efficiently

LoadTrak™ Asset Tracking is a low-cost service that tracks the location of mobile assets such as trailers, railway cars, or seasonal equipment.

ADVANTAGES

Here are some of the advantages of **LoadTrak Asset Tracking** when used as a trailer tracking device.

Maximize revenue

Ensure trailers are on the road generating revenue as often as possible. Because *Asset Tracking* has its own power source, it can locate trailers even when they aren't attached to tractors, so you can determine if they're sitting unused.

Reduce trailer-to-tractor ratio

Use existing trailers more efficiently by tracking and locating trailers, rather than purchasing or leasing additional trailers.

Protect assets

Reduce incidents of lost or stolen trailers by being able to locate trailers remotely.

USES

In addition to trailers, *Asset Tracking* can be used to track just about any type of mobile asset:

- ♦ Rail Cars
- ♦ Heavy equipment
- ♦ Portable bridges / buildings

HOW IT WORKS

A tracking unit is attached your asset and can send one to four location updates per day, depending on your needs. You can access this information from any computer with an Internet connection. The data is securely hosted by SaskTel, so you don't have to spend money on expensive infrastructure.

DETAILS

The tracking unit is easily installed and remarkably small (9"x 6.5"x1"). The unit is completely self-contained and includes a battery that will last over seven years sending two location updates per day.

For even more functionality, *Asset Tracking* can be used in conjunction with the **LoadTrak Vehicle Tracking Solution**.

Asset Tracking is part of the **LoadTrak Solution**, and is a service of **SaskTel**, a communications company with over 96 years of experience. For more information, contact an authorized *LoadTrak* dealer. Visit us online at www.loadtrak.com to locate the dealer nearest to you.
